PRATHAMESH KAMBLE

Full Stack Developer │ Web Developer │ MERN Stack

📞 +91 9867104527   @ truepratham2801@gmail.com   🔗 linkedin.com   🔗 github.com

SUMMARY

Full-Stack Developer specializing in the **MERN stack** with a strong background in building dynamic, scalable, and efficient web applications. Experienced in both **individual and team-based projects**, developing solutions that enhance user experience and system performance. Adept at front-end and back-end development, API integration, and database management. Passionate about writing clean, maintainable code and continuously improving technical skills

EXPERIENCE

Full-Stack Developer & Software Trainer

Itech Computer Education

🗓 03/2024 - Present   📍 Vasai-Virar, India

- **Led** the development and mentoring of **MERN-based applications**, enhancing trainees' hands-on experience while improving project success rates by **30%**.
- **Designed and deployed** scalable web solutions, integrating **RESTful APIs** and third-party services to improve application efficiency and user experience.
- **Trained and guided** aspiring developers in **frontend and backend technologies**, resulting in a **40% improvement** in project completion rates.
- **Resolved complex technical issues**, reducing bug occurrence in student and client projects by **50%** within six months.
- **Led interactive coding workshops**, improving trainees' grasp of **Java**Script, React, Node.js, and database management with a 95% positive feedback rate
- **Conducted specialized workshops across the education sector**, equipping students and professionals with **industry-relevant full-stack development skills**, resulting in a **higher adoption of modern web technologies**

EDUCATION

Bachelor of Science in Computer Science

Vidyavardhini's Annasaheb Vartak College

🗓 03/2022 - 05/2024   📍 Vasai-Virar, India

SKILLS

Full-Stack Development (MERN & PERN), Frontend Development (React.js, TailwindCSS, Framer Motion, Material UI), Backend Development (Node.js, Express.js, Authentication – JWT, OAuth), Database Management (MongoDB, PostgreSQL), Version Control (Git, GitHub, GitLab)

PROJECTS

MovieBlog – IMDb-Like Web Application (MERN, TailwindCSS)

Developed and deployed a full-stack **movie review platform** similar to IMDb, enabling users to **browse, review, and rate movies**.

Interactive API-Based Projects – Inspired by Neal.fun (Node.js, Express, React)

Designed and built **engaging, data-driven web applications** powered by custom APIs, offering **interactive user experiences**.Integrated **RESTful APIs** to fetch and display real-time data dynamically

Dynamic Online Portfolio (React, Framer Motion, TailwindCSS)

🔗 https://pratham-selfportfolio.vercel.app/

Designed and developed a fully responsive, **animated portfolio website**, showcasing projects with **smooth UI/UX interactions**.Integrated **Framer Motion** for seamless animations, enhancing the **visual appeal and user engagement**.

KEY ACHIEVEMENTS

⚙ **Developed & Deployed Scalable Web Applications**

Built multiple **full-stack projects**, including a **MovieBlog (IMDb-like app), API-based interactive projects, and a dynamic portfolio**, enhancing **user engagement and performance**.

⚡ **Integrated API with Engaging UI/UX Interfaces**

Designed **RESTful APIs** andLeveraged **TailwindCSS & Framer Motion** to create highly **interactive website experience**

🏅 **Awarded with Project of the Month**

Recognized as Developer of the Year for leadership and Comprehensive Thinker.
